

Training & Education

Risktec is a leading provider of consulting services for health, safety, security, environmental (HSSE) and business risks and is a validated partner with Liverpool John Moores University (LJMU) for delivering professional training and education via face-to-face (F2F) and distance learning (DL) methods.

THE COMPETENCY CHALLENGE

HSSE risk management is a relatively new profession, yet the demands on risk management practitioners are greater than ever due to increasingly complex legal requirements, coupled with higher company standards and new technologies.

To meet this challenge, forward-thinking organisations and individuals need to develop their practical HSSE skills, knowledge and experience by the most cost-effective route.

RISKTEC'S SOLUTION

Risktec goes beyond traditional training, offering a broad range of University-validated risk and safety management modules, taught by experienced consultants.

Our training may be formally assessed to validate student learning, or delivered attendance-only without assessment.

We offer both structured postgraduate programmes leading to University qualifications and more flexible solutions which can be tailored as needed. Customised solutions range from individual modules to multi-year staff development partnerships.

Our main award programmes are:

- Certificate of Professional Development (CPD) for single modules
- Postgraduate Certificate (PgCert)
- Postgraduate Diploma (PgDip)
- Masters Degree (MSc)

All of our teachers have been through a comprehensive development process and University validation in order to teach at postgraduate level. As a result, we provide a unique mixture of theory and practical experience.

KEY BENEFITS

For the client company:

- More skilled resource with formal qualifications and greater staff retention
- Relevant learning, by tailoring case studies and methods
- Up-to-date topics delivered by approved risk practitioners
- A modular approach that maximises flexibility
- Effective use of training budget through targeted, client-specific learning

For the student:

- Receipt of a formal qualification from a recognised institution
- Demonstration of learning rather than just attending a training course
- Specific learning, with case studies directly related to the place of work, which reduces the self-study burden
- Pathways through programmes that are tailored to individual needs

UNIQUE FEATURES

- Risktec specialises in assessing and managing major risks
- Postgraduate qualifications are offered, with learning delivered by practising risk consultants
- The whole programme is flexible to meet client needs: choice of modules, choice of delivery method (face-to-face or distance learning), choice of scheduling

Postgraduate Programmes in Risk & Safety Management

Postgraduate Certificate

Core module plus any 5 (see notes 1, 2)

Postgraduate Diploma

Core module plus any 11 (see note 2)

Master of Science

Core module, Research Methods module plus any 10 before starting Project

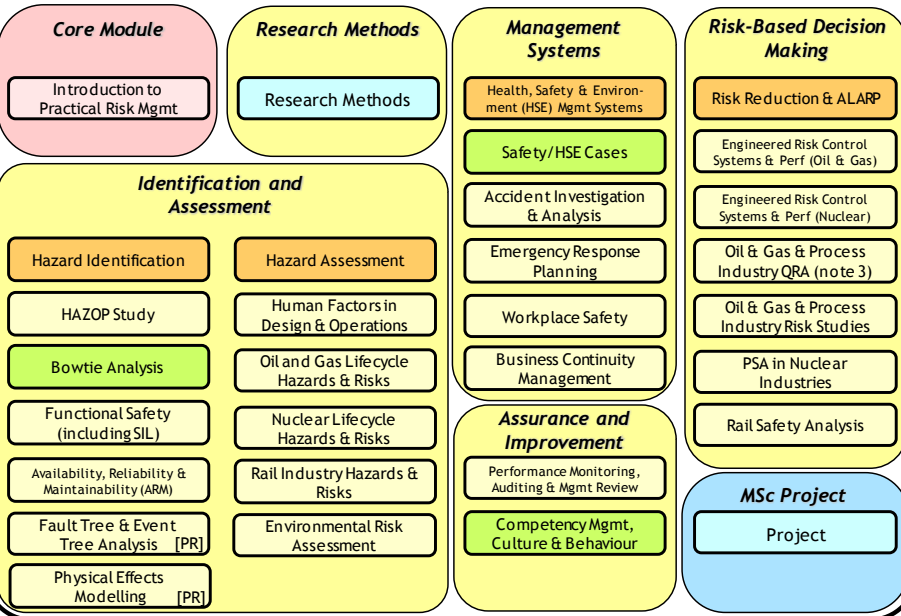

Note 1: For inexperienced students studying to PG Cert, 4 recommended modules are shaded orange, plus any 1 of 3 recommended options are shaded green

Note 2: For experienced students, example pathways comprise either technical or managerial modules, or a balanced mixture

Note 3: Pre-requisites for QRA module are indicated by [PR]

Key features:

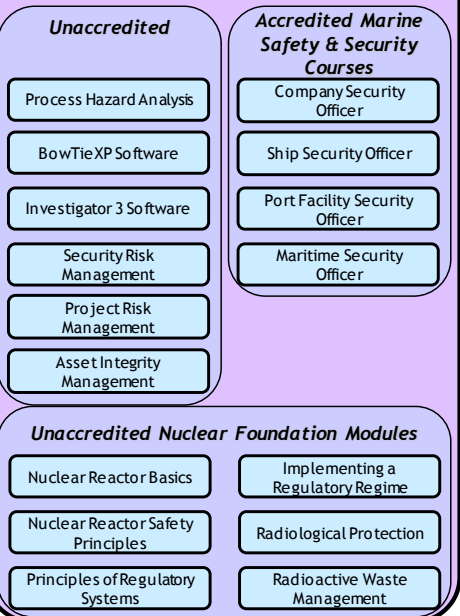

- Corporate face-to-face (F2F) or distance learning (DL) programmes available
- Each module typically involves 100 hours of study and a formal written assessment
- Modules and assessments can be tailored to client's facilities and operations
- F2F programme can be delivered at client's premises and timing is flexible
- DL programme includes online tests, discussion forums and virtual classroom
- Modules can be delivered as PgCert, PgDip or MSc programme, stand-alone for CPD awards or without assessment for CPD evidence
